

YOUR KEY TO SECURE, EFFICIENT CHECK SIGNING

Save time, save money, and improve security with WySign: the simple, secure solution for automated check signing. WySign physically separates the check signing and printing functions for optimal security. WySign eliminates the noise, messy signature plates and cumbersome operation of mechanical check signers — turning your desktop printer into a fast, secure and quiet check signer.

GET THE WYSIGN ADVANTAGE

EXCEPTIONAL SECURITY

WySign's advanced security line, signature encryption and custom signature backgrounds secure the check signing process. Users are created with custom permission levels to further protect check signing, report access and overlay edits.

SIMPLE TO SET UP

A graphical interface eliminates the need to measure for signature alignment. Just print the WySign grid on your check and set up signature placement.

EASY TO USE

Insert the WySign USB drive into any computer. Log in with a secure user name and password, choose your check overlay, specify how many checks to sign, and WySign does the rest.

SIMPLE TO AUDIT

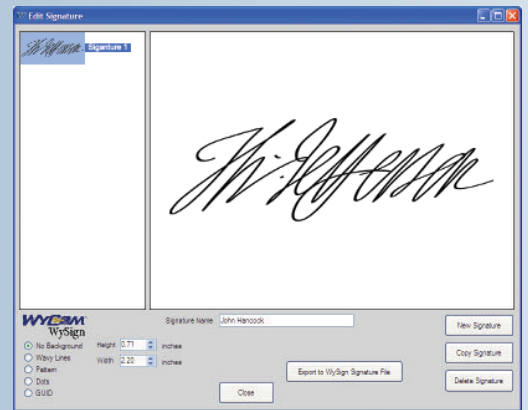

An audit log accounts for every check signed; you always know who signed checks, when checks were signed, and which overlays and signatures were used.

FLEXIBLE

Use the WySign USB key on any computer you choose. WySign supports an unlimited number of check overlays and signatures, making it easy to customize check signing.

PRINTER-COMPATIBLE

WySign works with most inkjet, laser and multi-function printers.

WySign makes it easy to customize signature sizes and backgrounds.

Our advanced security line will micro-print the WySign serial number, time and date of signing and a secure audit number for each signature printed.
